

Cyber Security and GDPR

How much do you really know about the cyber risks facing your business?

Can you provide an independent audit of your procedures and precautions for customers?

How can you be sure you have the right cyber security and GDPR measures in place?

All very good questions, because SME's are more likely than large corporations to suffer a cyber-attack, mainly because they are less prepared.

The criminals aim to steal your data or your money, cause chaos in your systems, hold you to ransom, close down your website, and more. Without the right security in place, they see you as their 'easy target'.

So thinking: "No one will bother to hack us" may be a very costly mistake! Even if you're not targeted directly, your vulnerabilities can be detected easily and automatically, then passed on to the criminals for further extortion.

In today's digital age, it's vital you safeguard your cyber security to ensure GDPR compliance and your peace of mind; which is exactly what our independent cyber services are designed to do.

Choose the right option for your business

Cyber Security Audit

helps you identify and rectify any concerns about your organisation's cyber security levels.

Cyber Essentials Certification

supports you to achieve the Government approved certification, however you work and whatever the size of your business.

GDPR Compliance

ensures your business meets the IASME Governance standard, avoiding the risk of complaints, fines and reputational damage.

With a monthly payment package, you will also benefit from ongoing support and annual recertification.

Working with Empiric Partners costs less than you may think. Call us for a no-obligation competitive quote.

Cyber Security Audit

Designed to resolve doubts and issues with your cyber protection measures.

If you have any concerns about your organisation's cyber security levels – however small – then our Cyber Security Audit provides you with a way forward. Conducted through interviews with your key staff and IT provider(s), the outcome is a written report with traffic-light coded recommendations where cyber security risks are found.

Monthly Cyber Essentials

If you would like the reassurance of cyber expertise on-call, with the added bonus of spreading the capital cost of certification over 12 months, no-hassle annual recertification, then our monthly Cyber Essentials option can help.

Providing all the benefits of the standard Cyber Essentials Certification service (as above), plus ongoing, on-call access to specialist cyber support, and annual re-certification too.

Cyber Essentials Certification

Cyber Essentials is the government-supported scheme which helps you guard against cyber threats, demonstrate your commitment to cyber security and measure your current defences against a nationally recognised standard.

Whatever your size of business, whether your staff work in an office, at home or both, using use on-premise or cloud-based systems, our service guarantees you certification.

- A pass, first time!
- Free £25k Cyber Insurance (backed by AXA) for 12 months
